SHINICHI SUZUKI
October 17, 1898–January 26, 1998

There are moments in history when a place, a time, a man, and an idea converge to produce results of great significance. Such a moment occurred when Shinichi Suzuki began his experiments in violin teaching in Japan. The results have attracted widespread attention, and have generated much speculation about the nature of musical learning and the way in which every human being develops in the early formative years. It is not that any particular segment of Suzuki's ideas is new, but rather that the totality of his concepts, together with the results he has shown, throw a clear light on a question we wish to explore—how do human beings become musical?

The Suzuki Violin Method in American Music Education

— John Kendall

History of the Suzuki® Method

One Man's Vision

Shinichi Suzuki—violinist, educator, philosopher, and humanitarian—was born in 1898, the son of Japan's first violin manufacturer. Suzuki worked in the violin factory as a child, but was not interested in playing the violin until he was seventeen. Suzuki then studied violin in Japan for some years before going to Germany in the 1920s for further study.

When he returned to Japan, Suzuki and his brothers formed a string quartet that toured extensively. He also taught violin at universities in Tokyo and elsewhere. During this period, Suzuki became interested in the education of young children.

Beginnings

After World War II, Suzuki carried his interest and sympathy for children into his work as a musician and teacher. He based his approach on the belief that musical ability is not an inborn talent, but an ability that can be developed—that the potential of every child can grow if the child is given the proper training and learning environment. Noting that children learn to speak their native language with ease, Suzuki applied the basic principles of language acquisition to the learning of music. He called his method the mother-tongue approach, or Talent Education.

In 1945, Suzuki was invited to teach at a school in Matsumoto. He accepted with the condition that he could try this new method he had developed to teach violin to very young children. (Today the method includes piano, violin, viola, cello, bass, flute, harp, guitar, recorder, organ, trumpet, and voice.)

Within a year after beginning his program, Suzuki presented some of his young students at a concert in Tokyo. Listeners were amazed at the performance of the children, and the Talent Education movement began to grow.

*It may very well
be music which
will save the world.*

—Pablo Casals

Development of the Method

Over the next 30 years, Suzuki did extensive research to develop his series of violin repertoire books. He chose his pieces carefully, so they would present musical and technical points in a logical, sequential manner. Other violin teachers studied with Suzuki and began to teach throughout Japan. The Talent Education program expanded to include other instruments, and materials were designed and published for piano, cello, and flute. Thousands of children received Suzuki training at the Talent Education Institute in Matsumoto or one of the branch schools in other Japanese cities.

Introduction to the Americas

Suzuki's Talent Education was introduced in the U.S. when a film of the first National Graduation Concert in Japan was shown at Oberlin College in 1958. Since then, teachers from many countries have visited Japan to learn more about Suzuki and his work. Suzuki's tour group of ten Japanese children came to the United States for the first time in 1964. Since then, tour groups of Japanese children have performed annually for audiences all over the world.

Suzuki Method Today

Suzuki's idea of teaching peace and understanding through music gradually gained acceptance. His active leadership for more than 50 years until his death in January of 1998 brought thousands of parents and teachers in at least 50 countries in Asia, Europe, Australia, Africa, and the Americas to join his effort to nurture loving human beings through the mother-tongue approach to music education. Thousands of children throughout the world are now able to gather and play together, overcoming linguistic and cultural barriers through the language of music. The dream of Dr. Shinichi Suzuki is coming true.

Special Features of the Suzuki® Method

An Early Beginning

Talent Education usually begins at an early age. Suzuki suggested that parents repeatedly play recordings of classical music for their infants and toddlers. Formal training often begins at age three or four, but it is never too late to begin the Suzuki Method.

Parent Involvement

As when a child learns to talk, Suzuki parents are involved in the musical learning of their child. Parents work with the teacher to create an enjoyable learning environment, especially at home, so that much of the child's motivation comes from enthusiasm for learning and the desire to please. Parents attend lessons with their child and serve as "home teachers" during the week. They supervise practicing, making sure the student does exactly as the teacher instructed. Sometimes, one parent learns to play before the child, so the parent understands what the child is expected to do.

Younger students, whose attention spans are short, may have several brief practices each day, instead of one long practice. The parent encourages the child, giving praise for each effort, so practice time is a positive experience. The length of practice time gradually increases as the student advances through the repertoire. Parents need not be musicians. They are taught step-by-step how to help the child at home. Each child learns at his or her own rate, building on small steps so each one can be mastered. Teachers and parents meet the child's efforts with sincere praise and encouragement. Children are also encouraged to support each other's efforts, fostering an attitude of generosity and cooperation.

The Suzuki teacher actually serves as mentor to both the parent and child in their study of the instrument—teaching the child at the lesson and guiding the parent in developing effective techniques for teaching the child at home.

Parents have a great responsibility as home teachers beyond attending lessons and assisting with practice at home. Their role involves committing themselves to their own ongoing education about the Suzuki approach, creating a musical environment, learning the fundamentals of playing the instrument and taking care of it, and creating a total environment of affection, encouragement, and understanding. The most important ingredient for success is the parents' willingness to devote regular time to work closely with the child and the teacher.

The Suzuki Method requires a three-way partnership among the student, the teacher, and the parent—all working together to combine a philosophy, a technique, and a program of education.

*Where there's a will,
there's a way.*

—Bernard Shaw

Listening and Observing

Children learn to speak by listening and imitating the language spoken around them. By listening to recordings of the literature they will learn, as well as listening to other music, children absorb the language of music just as they absorb the sounds of their mother-tongue.

Children can learn a great deal from each other, so Suzuki students are encouraged to observe the private lessons of other students. They enjoy observing other children at all levels— aspiring to the level of more advanced students, sharing challenges with their peers, and appreciating the efforts of those following in their footsteps.

Repertoire

All Suzuki students follow the same sequence of musical materials for their particular instrument, with each piece becoming a building block in the careful development of technique. Each discipline—piano, violin, viola, cello, bass, flute, recorder, harp, guitar, and organ—has its own repertoire. This standardized repertoire also provides strong motivation as younger students want to play music they hear older students play.

Review is an important aspect of The Suzuki Method. Through constant repetition of pieces, children strengthen old skills and gain new ones. Students can hear for themselves the progress they have made.

Individual and Group Activities

In addition to their own individual lessons, students participate in group lessons, performances, and observation of other children's lessons—all activities that are valuable aids to motivation.

Children learn from more advanced students and from their peers. Children love to do what they see other children do.

Group lessons also provide frequent opportunities for children to play solos in a relaxed, informal setting. Here each child may show what he or she has accomplished and has the opportunity to learn from the performances of other students. Parents are encouraged to schedule home recitals so both parents, not just the one working daily with the child, can share in the child's progress and provide motivation to practice more. Frequent opportunities to play before an audience increase the student's self-confidence, and that student enjoys, rather than fears, playing before others.

All photographs are by Arthur Montzka.

Reading

Music reading is postponed until the child's aural and instrumental skills are well established, just as we teach children to read language only after they can speak. In this way, the focus of the teacher's and student's attention can be on the development of good posture, beautiful tone, accurate intonation, and musical phrasing.

Enriching Children's Lives Through Music

The purpose of Suzuki training is to help every child find the joy that comes through music making. Through the mother-tongue approach, children develop confidence, self-esteem, self-discipline, concentration, and the determination to try difficult things. In the environment of loving support fostered by the Suzuki Method, children develop a lasting enjoyment of music.

Dr. Suzuki's primary goal was never just to teach young people how to play musical instruments. Rather, he championed the unique contribution music can make in the total learning process. He believed that with the proper environment and educational process and through the medium of music, sensitivity and understanding may be raised in children, creating for each child a better life—and for us all, a better world. Talent Education not only provides the child with an enriching musical experience, but also creates an atmosphere of sharing and mutual learning in which parent and child can bond in a unique and rewarding manner.

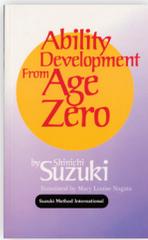

Although Dr. Suzuki has finished his earthly presence among us, his spirit remains and is manifested daily in the myriad of teachers and students who live his principles and his dream.

*Where love is deep,
much will
be accomplished.*

Nurtured by Love
Which translation to read?

“As a young mom, browsing in the local music store, the title of *Nurtured by Love* caught my attention. I was familiar with Suzuki as my husband had attended Suzuki training, but I had never read the book. This timeless book was so inspiring that I immediately read it a second time. Fast-forward 35 years and it was a fascinating privilege to be the editor for the new translation of this foundational text. At the request of the ISA, Kyoko Selden, with Lily Selden, created a new translation directly from the original Japanese. The first translation was done by Suzuki’s wife, Waltraud, a native German speaker. With differing interpretations and tone, each translation carries a powerful message. I highly recommend that everyone read both translations. The Spanish translation provides an important resource for Spanish-speaking communities. A wonderful addition to the original translation and to the revised translation, is the comprehensive index, created by and donated by Zachary Ebin.”

AMPV Numbers

Remember that in the front of most books, there is an AMPV (Alfred Music Publishing Version) number. When corrections are made to a book, the AMPV number goes up; for example it might change from 1.01 to 1.02. The list of the most current printings is at alfred.com/suzuki-ampv. This is the best way to find the latest edition. ISBNs numbers do not change on reprints.

ORGAN

Suzuki Organ School

The first classical organ method for children, the *Suzuki Organ School* is based on Dr. Suzuki's Mother-Tongue Method. In order to develop pedal technique, pedal melodies are included between every manual piece. Non legato pieces contain small phonetic signs above the notes to indicate differentiated non-legato playing.

Tonalization

By Shinichi Suzuki

Dr. Suzuki questioned why all vocalists vocalize every day to improve their voices, but instrumentalists do not play their instruments every day. He believed that on any instrument, one needs

to practice to make a more beautiful tone. This book covers how to make a difference in the tone by using a different bow speed, how to practice to find the resonance point, how to change the weight of the arm on the bow to produce a different kind of tone, and how to change tone color.

Why Teacher Training?

Philosophy of the Suzuki Teacher Development Program

The Suzuki Association of the Americas (SAA) is committed to Dr. Suzuki's philosophy that all children are deserving of music education, and are capable of meaningful growth if provided with a loving and supportive environment. We exist to ensure that teachers receive the training necessary to nurture the talent in young people through the Suzuki Method™.

The SAA offers a comprehensive Teacher Development program to support teachers in creating the best possible learning environment for their students, an environment that puts a priority on the development of fine character along with great musicianship.

The program is designed for teachers with a background in music and a strong interest in supporting youth. The program's carefully organized curriculum is presented by experienced SAA-registered Teacher Trainers who guide the participants through the Suzuki Method™ repertoire and pedagogy unit by unit.

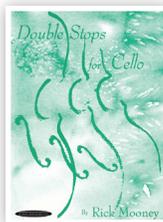

Along with the pedagogical skills for working effectively with students of all levels and learning styles, the program provides opportunities for an ever-deepening understanding of the Suzuki Philosophy. Mutual respect among colleagues, a generous spirit of sharing, and a belief in the value of Suzuki teaching as a profession are the indispensable underpinnings of all areas of SAA's Suzuki Teacher Development program.

Arranged by Goran Berg

Violins Go Vivaldi contains arrangements with reproducible parts that will challenge the advanced violin student's ensemble playing skills and can be played both as chamber music with four players or in a group setting with many players in each part. The third movement of "The Summer" is an exciting, fast piece with moderately easy sections paired with difficult solos, and is orchestrated according to the original mix of tutti sections and solo sections. The first movement of *Concerto Grosso in D Minor* at first provides a duet for all to play, where the students take turns to bring out the important parts versus holding back the sound in the accompanying sections.

CELLO SOLOS & ENSEMBLES

Ensembles for Cello
By Rick Mooney

Prepared and edited by a well-known Suzuki teacher, teacher-trainer, and member of the Suzuki Cello Committee, these books contain harmony parts to go with many of the pieces in the *Suzuki*

Cello School, Volumes 1, 2, 3, and 4. All of these pieces have been arranged to resemble, as much as possible, the existing piano accompaniments. These ensembles enable a cello teacher (who does not play or have access to a piano) to play harmony parts with students to prepare them for the time when a piano and pianist are available. These parts also provide additional challenges for the more advanced player during a group lesson.

A Sequenced Guide to American Fiddling

By Crystal Plohman Wiegman, Renata Bratt, and Bob Phillips

Introduce your students to very easy and fun settings of American music with this collection and fiddling method.

The carefully sequenced tunes and exercises will supplement any beginning method, including Suzuki.

The violin book is generally in the keys of A and D while the viola and cello/bass books are in the keys of D and G. If all strings are playing together, use the kick-offs to transition to the new key.

The extreme flexibility works for private instruction, Suzuki group class, ensembles, and school orchestra where students of various levels can play together.

Teacher Instructions

For teachers who aren't fiddlers, the "how-to" section explains the elements of fiddling in achievable sections:

- Melody
- Breaks
- Back-ups
- Kick-offs
- Tags
- Guitar chords
- Ensemble parts
- Piano accompaniment
- Creative exploratory activities

Student Instructions

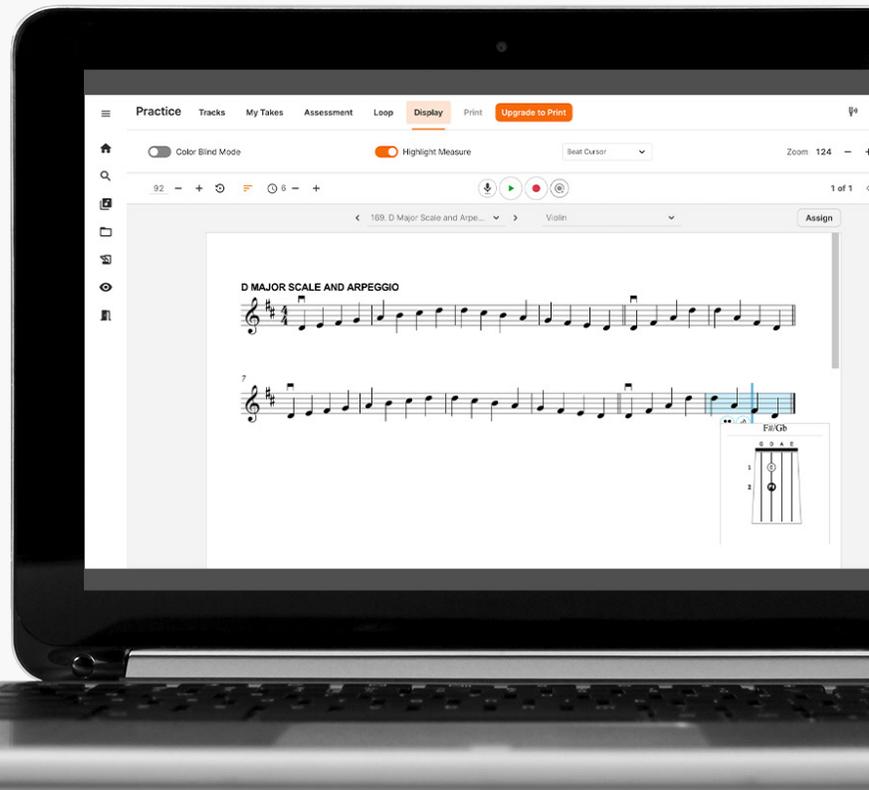

First, guide your students through singing the tune and the fun words. Then, play the tune, being sure to explore the innovative ensemble parts that allow each instrument to accompany the others in mixed instrumentation.

PIANO LITERACY

The Music Road

A Journey in Music Reading
By Constance Starr

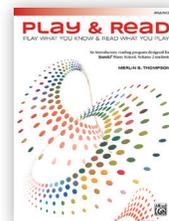

This 3-volume series, which is based on the Suzuki approach, presents an

effective sequence for beginning music readers. Each unit is divided into three parts: "Stop! Look! Learn!" presents new material supported by written activities, "Stop! Look! Play!" presents new material in simple playing examples, and "Destination" uses folk songs and original music to offer opportunities to "see and play" what has just been presented. Each unit has a corresponding "Stop! Listen!" appendix in which the ear is trained to hear what has been seen on the printed page.
